PI 537600 **donor id:** 1005. **origin:** United States. **other id:** R5823. **remarks:** Selected for flower color genetics. Flowers orange. Contains 2 dominant genes for "dirty dilute" color (D1D1), 2 dominate genes for dilute color (DD), and 2 recessive genes for orange color (oo). Breeding Material. Seed.

PI 537601 **donor id:** 1006. **origin:** United States. **other id:** R5824. **remarks:** Selected for flower color genetics. Flowers yellow. Contains 2 dominant genes for "dirty dilute" color (D1D1), 2 dominate genes for dilute color (DD), and 2 dominant genes for yellow color (00). Breeding Material. Seed.

PI 537602 **donor id:** 1007. **origin:** United States. **other id:** R5825. **remarks:** Selected for flower color genetics. Flowers "dirty dilute yellow". Contains 2 recessive genes for "dirty dilute" (d1d1), 2 recessive genes for dilute color (dd) and 2 dominant genes for yellow color (00). Breeding Material. Seed.

PI 537603 **donor id:** 1008. **origin:** United States. **other id:** R5829. **remarks:** Selected for flower color genetics. Flowers "dilute cream color". Contains 2 dominant genes for "dirty dilute" color (D1D1), 2 recessive genes for dilute color (dd) and 2 recessive genes for light yellow color (cc). Breeding Material. Seed.

PI 537604 **donor id:** 1010. **origin:** United States. **other id:** R5834. **remarks:** Selected for flower color genetics. Flowers "dilute red" Contains 2 recessive genes for flower color (dd), and 2 recessive genes for red flower color (rr). Hull type gray striped with 2 recessive genes for gray striped hulls (stp g stp g). Breeding Material. Seed.

PI 537605 **donor id:** 1011. **origin:** United States. **other id:** R5835. **remarks:** Selected for flower color genetics. Flowers "dilute red". Contains 2 recessive genes for dilute flower color (dd), and 2 recessive genes for red flower color (rr). Hull type gray striped with 2 recessive genes for gray striped hulls (stp g stp g). Breeding Material. Seed.

PI 537606 **donor id:** 1012. **origin:** United States. **other id:** R5682. **remarks:** Selected for flower color genetics. Flowers red. Contains 2 dominant genes for dilute flower color (DD), and 2 recessive genes for red color (rr). Breeding Material. Seed.
